

AMENDMENTS TO THE DRAWINGS:

Attached herein please find a copy of amended Fig. 1 as submitted on 7/28/03, which has been identified by the Examiner with regard to reference character 34 as not being in the same location as originally filed Fig. 1, a copy of which is additionally attached. As set forth in the originally filed detailed description on page 7, lines 19-21, reference Figure 34 describes a "recessed center panel" which "provides additional spacing to allow a user to engage the pull ring during use." A further depiction of item #34 may be seen in originally filed Fig. 3, which is also attached herein for the Examiner's reference.

Since it is respectfully submitted that amended Fig. 1 depicts the proper location of the recessed center panel #34 as supported in the Specification and Fig. 3, a subsequent revision to amended Fig. 1 is not being provided at this time. Furthermore, upon receipt of a Notice of Allowance, the drawing discrepancies noted in Paper No. 9 by the official draftsman will be corrected and new formal drawings will be timely submitted.
